HM 1157	200x150x51cm
HM 1158	300x250x52cm
For the protection and delivery of sterile instruments to operating rooms.	

Kidney Dish Pulp, Disposable

Cat. No.	Size	Packing
HM 1159	800ml	300/case

Male Urinal (Pulp)

Cat. No.	Packing
HM 1160	110/case

ADVANTAGES

- Accurate & fine spray technology of additives
- Soft Safety cap for decapping & recapping and minimized force for manual decapping
- Gel tube without influence on hormone and TDM
- Optimized tube dimension for all types of instruments
- Minimized eccentricity to keeping vacuum at optimal condition until expiry date
- Compatible raw material and size to NCCLS instructions and advices
- Optimal hardness and functionality of rubber stopper for blood collection
- Compact package for delivery and storage
- All of production steps controlled by automated sensor to eliminate any problem
- Complete product range made of virtually unbreakable plastic

Blood Collection Set

HM 1215	25G

Spinal Needle (Quincke Bevel)

Intended for spinal (sub Arachnoid) anesthesia.

Ultra fine quincke tip for better dura puncture appreciation and to prevent post dura puncture headache.

Color-coded hub-stylet (International standard) for fast detection of the needle size.

Optimal sized stylet prevents tissue coring and obstruction of the needle size.

Transparent hub for fast detection of CSF.

Needle length 3.5".

Urine Collection Bag

Incontinence Pads

Cat.No.	Size	Packing
HM 1233	60x40cm	240/case
HM 1234	60x90cm	150/case

With the growing population, the number of people with chronic diseases and disabilities is increasing which leads to a rise in multi-morbidity and need for care. The risk of infection associated with care-needing patients is largely determined by hygienic measures adopted. These offerings maintain hygiene standards and provide care to patients with restricted mobility

DISPOSABLE UNDER-PADS offer superior mattress protection without sacrificing comfort. The combination of unique quilted pattern and silicone release liners at the edges ensure rapid absorption and comfort in use at the same time. These under-pads are designed to deliver higher level of patient hygiene as they are made of material which have an extremely low potential for allergic reactions.

Coverall/Working Gown SMS

Water Soluble Bag 710 X 990mm

Products for infection control in hospitals include water soluble laundry bag and hamper stands. Products are mainly used for packing the reusable linens with large number of potential biological or chemical contamination in the hospitals or working places with occupational disease risk. It can minimize the spreading of viruses, patients and contaminants, reduce the risk of cross-infection among operating personnel, patients and contaminated articles, which will reduce the contamination of the working environment. It has become an international and standard process to handle the reusable medical linens with water soluble laundry bag for infection control.
